

# TABLE OF CONTENTS

	<b>PAGE#</b>
CHAPTER 1 - PROJECT DESCRIPTION .....	1-1
Project Summary.....	1-1
Guiding Principles .....	1-5
Goals and Objectives .....	1-6
CALFED Objectives.....	1-6
Auburn Ravine/Coon Creek CRMP Objectives .....	1-6
General Watershed Descriptions.....	1-10
Auburn Ravine .....	1-10
Markham Ravine.....	1-12
Coon Creek .....	1-12
Doty Ravine .....	1-12
East Side Canal .....	1-13
Cross Canal .....	1-13
 CHAPTER 2 - METHODOLOGY .....	 2-1
Watershed Assessment Report Methodology .....	2-1
Identification of Key Resources.....	2-1
Restoration Program Methodology.....	2-3
Project Identification.....	2-3
Project Implementation.....	2-6
Monitoring Guidelines .....	2-6
 CHAPTER 3 - GROWTH PROJECTIONS AND LAND USE TRENDS .....	 3-1
Introduction.....	3-1
Existing and Projected Growth.....	3-1
Future Buildout .....	3-2
Current Land Uses .....	3-3
Public Land Use Management Objectives and Implications of Management Activities .....	3-7
Land Use and Natural Resource Management Policies and Objectives .....	3-7
Implications of Current Management Activities.....	3-14
Management Concerns.....	3-16
Summary of Findings.....	3-18
 CHAPTER 4 - WATER RESOURCES.....	 4-1
Introduction.....	4-1
Water Management Practices .....	4-1
Water Conveyance .....	4-2
Auburn Ravine .....	4-3
Water Sources .....	4-3
Water Management.....	4-4

# TABLE OF CONTENTS

	<b>PAGE#</b>
Coon Creek .....	4-5
Water Sources .....	4-5
Water Management .....	4-6
Doty Ravine .....	4-6
Water Source and Management .....	4-6
Management Concerns.....	4-7
Summary of Findings.....	4-11
CHAPTER 5 - STREAM SEDIMENT.....	5-1
Introduction.....	5-1
Stream Erosion and Sedimentation Processes .....	5-1
Objectives of the Sediment Analysis .....	5-3
Conceptual Basis for Watershed and Stream Sedimentation Analysis.....	5-3
Stream Order .....	5-4
Channel Confinement Class.....	5-4
Channel Confinement Sub-Class .....	5-6
Channel Bedform Type.....	5-6
Predominant Bed Material .....	5-7
Analyzing Sediment Regimes using these Classification Systems.....	5-7
Characterization of Primary Channel Segments in the Watersheds .....	5-8
Channel Conditions of Mainstem Segments.....	5-8
Cross Canal .....	5-8
East Side Canal .....	5-9
Channel Conditions in Streams Above the East Side Canal.....	5-10
Coon Creek .....	5-10
Doty Ravine .....	5-15
Auburn Ravine .....	5-17
Dutch Ravine .....	5-23
Management Concerns.....	5-24
Summary of Findings.....	5-35
CHAPTER 6 - WATER QUALITY .....	6-1
Introduction.....	6-1
Beneficial Uses .....	6-1
Diversions and Discharges.....	6-2
Point Sources .....	6-2
Nonpoint Sources.....	6-5
Data Sources and Monitoring Programs .....	6-7
Water Quality Issues and Concerns .....	6-8
Temperature .....	6-8
Nutrients.....	6-12
Dissolved Oxygen.....	6-13
Heavy Metals .....	6-14
Pesticides.....	6-17
Turbidity and Suspended Sediment .....	6-18

# TABLE OF CONTENTS

	<b>PAGE#</b>
Management Concerns.....	6-19
Summary of Findings.....	6-20
Temperature .....	6-20
Nutrients and Dissolved Oxygen .....	6-21
Heavy Metals .....	6-21
Pesticides.....	6-22
 CHAPTER 7 - PLANT COMMUNITIES .....	 7-1
Introduction.....	7-1
Description of Plant Communities.....	7-4
Mixed Riparian Forest .....	7-4
Great Valley Willow Scrub.....	7-5
Valley Freshwater Marsh.....	7-5
Distribution of Plant Communities .....	7-5
Effects of Past and Present Land Uses on Plant Community	
Distribution .....	7-6
Distribution in the Higher Elevations of the Watersheds .....	7-6
Distribution in the Lower Elevations of the Watersheds .....	7-8
Invasive Species.....	7-10
Special Status Plant Species.....	7-11
Management Concerns.....	7-11
Summary of Findings.....	7-15
 CHAPTER 8 - FISHERY RESOURCES .....	 8-1
Introduction.....	8-1
General Life History Summary.....	8-1
Chinook Salmon.....	8-1
Steelhead Trout .....	8-2
Other Native Species.....	8-3
General Fish Species Composition .....	8-3
Factors Influencing Aquatic Habitat Quantity and Quality .....	8-4
Water Flow Fluctuation .....	8-4
Water Sources .....	8-5
Sediment Deposition.....	8-5
Water Temperature .....	8-5
Dissolved Oxygen.....	8-7
Contaminants .....	8-8
Migratory Impediments .....	8-8
Species Introduction.....	8-9
Condition of the Riparian Community .....	8-10
Management Concerns.....	8-10
Summary of Findings.....	8-15
 CHAPTER 9 - WILDLIFE RESOURCES .....	 9-1
Introduction.....	9-1

# TABLE OF CONTENTS

	<b>PAGE#</b>
Habitat Types and Associated Wildlife .....	9-1
Mixed Riparian Forest and Great Valley Willow Scrub.....	9-1
Great Valley Freshwater Marsh.....	9-2
Special Status Wildlife Species .....	9-2
Ecosystem Restoration Issues Regarding Special Status and Key Resource Wildlife Species .....	9-5
Management Concerns.....	9-8
Summary of Findings.....	9-13
 CHAPTER 10 - PROJECT IDENTIFICATION .....	 10-1
Markham Ravine Watershed.....	10-2
Auburn Ravine Watershed.....	10-15
Doty Ravine Watershed .....	10-37
Coon Creek Watershed .....	10-53
Overall ERP Planning Area .....	10-76
 CHAPTER 11 - PROJECT IMPLEMENTATION .....	 11-1
Implementation Procedure .....	11-1
Class-Specific Level Projects .....	11-2
Funding Opportunities .....	11-2
Implementation Entity/Responsible Party .....	11-3
Landscape-Level Projects .....	11-3
Funding Opportunities .....	11-3
Implementation Entity/Responsible Party .....	11-4
Programmatic-Level Projects.....	11-4
Funding Opportunities .....	11-4
Implementation Entity/Responsible Party .....	11-4
 CHAPTER 12 - MONITORING GUIDELINES .....	 12-1
Data Quality Assurance and Quality Control .....	12-4
Adaptive Management .....	12-4
 APPENDICES	
Appendix A - Stream Sediments	
Appendix B - Water Quality	
Appendix C - Plant Communities	
Appendix D - Fisheries Resources	
Appendix E - Wildlife Resources	
 MAPS	
Map 1 - Area of High Gully Erosion Potential	
Map 2 - Relative Groundwater Recharge Potential	
Map 3 - Precipitation/Rainfall Zones	
Map 4 - Geology	
Map 5 - Groundwater Recharge Potential Significance
